

Education and Medical Experience

Medical background, surgical practice and current technology studies

Former general surgeon with more than eight years of clinical and surgical experience, including emergency and elective abdominal surgery. Currently studying Web Technologies at EEK Mainor while transitioning into medical simulation, XR and MedTech development.

Current Education

Current	Web Technologies - Bachelor's degree programme Estonian Entrepreneurship University of Applied Sciences (EEK Mainor), Estonia
---------	---

Medical Education and Professional Training

2006-2012	Degree in General Medicine Saint Petersburg State Pediatric Medical University
2012-2013	Internship in Surgery
2013-2015	Residency in Surgery
2016	Advanced Training Emergency Surgery of the Abdominal and Retroperitoneal Organs
2020	Continuing Professional Education in Surgery
Dec 2020 - Mar 2021	Professional Retraining in Oncology
Sep 2021 - Nov 2021	Professional Retraining in Transfusiology

Clinical Work Experience

2014-2016	Surgeon Tikhvin District Hospital
2016-2018	Surgeon N. I. Pirogov Clinic of High Medical Technologies, Saint Petersburg State University
2018-2020	Emergency Surgeon 2nd Surgical Department, City Hospital No. 26, Saint Petersburg
2020-2022	Surgeon Surgical Department, E. E. Eichwald Clinic, North-Western State Medical University named after I. I. Mechnikov

Selected Surgical Experience

Outpatient surgery

- Removal of lipomas
- Removal of atheromas
- Incision and drainage of furuncles
- Incision and drainage of hidradenitis
- Primary surgical wound treatment with suturing
- Incision and drainage of paraproctitis

Elective surgery

- Hernia repair for inguinal, umbilical, and postoperative ventral hernias
- Laparoscopic inguinal hernia repair
- Tracheostomy
- Gastrostomy
- Milligan-Morgan hemorrhoidectomy
- Laparoscopic cholecystectomy

Emergency surgery

- Open appendectomy
- Laparoscopic appendectomy
- Repair of perforated gastric and duodenal ulcers
- Laparoscopic repair of perforated gastric and duodenal ulcers
- Adhesiolysis
- Creation of loop and end colostomies
- Repair of penetrating abdominal stab wounds with injuries to the small and large intestine
- Hernia repair for strangulated inguinal and umbilical hernias
- Small bowel resection with anastomosis
- Hartmann's procedure
- Right hemicolectomy
- Left hemicolectomy

Relevance to MedTech

This clinical background provides practical knowledge of anatomy, surgical workflow, operating-room communication, procedural training needs and the real-world context in which surgical technologies are used.
